

**AMENDMENT TO THE SPECIFICATION**

*Please amend the specification as follows:*

*Paragraph [0038]*

[0038]

The nickel plate on which the structure was electro-deposited was removed from the glove box into the air as a structure of ~~EXAMPLE~~ Example 1. The same procedures as described above were performed several times to prepare a plurality of structures of Example 1.

*Paragraph [0040]*

[0040]

The components other than carbon (C), such as tungsten (W), zinc (Zn), oxygen (O), cobalt (Co), nickel (Ni), and iron (Fe), were determined by ICP emission spectroscopic analysis with respect to samples of the structures of ~~EXAMPLE~~ Example 1 dissolved in an acid. The carbon (C) content of the structures of Example 1 was evaluated in an oxygen stream by a high-frequency heating combustion-infrared absorption technique.

*Paragraph [0048]*

[0048]

The evaluation of the structures of ~~EXAMPLE~~ Example 1 was performed using a plurality of structures prepared as described above.
